

The toner of the present invention may also be a liquid toner containing 30% by weight to 50% by weight of a mixture containing 0.5% by weight to 1.5% by weight of carbon black, 0.5% by weight to 1.5% by weight of a charge control agent and 85% by weight to 95% by weight of a binder resin; and 50% by weight to 70% by weight of a carrier liquid.

At page 17, starting at line 18, please amend the following two paragraphs as follows:

Forty % by weight of the toner obtained with the formulation of the dry polymerized system and 60% by weight of a carrier liquid (Isopar H, Exxon) were mixed, and kneaded by a sand mill to prepare a toner.

<Toner preparation method 5>

Forty % by weight of a mixture consisting of 1 part by weight of carbon black (MA-7, Mitsubishi Chemical Corp.) as a colorant, 0.5 part by weight of a charge control agent (Reflex Blue R51, Hoechst AG), and 98.5 parts by weight of a binder resin was mixed with 60% by weight of a carrier liquid (Isopar H, Exxon). The mixture was kneaded with a sand mill to prepare a toner.

See Appendix 1 for the changes to the specification. The terms bracketed were canceled from the specification and the terms underlined were added to the specification.

In the Claims

Please cancel claim 37.

Please amend claims 35, 38 –40, 42, 48, 49, 51, 55:

35. A toner for developing an electrostatically charged image, the toner comprising
